Career Summary

- Python Developer with 1.6+ years of experience in building web applications, APIs, and automation tools.
- Proficient in Django, FastAPI, and Flask, with hands-on deployment experience on AWS and GCP.
- Skilled in database design and REST API development, ensuring scalable and efficient solutions.
- Recognized with the Best Project Award (2024) for innovative problem-solving.
- Passionate about contributing to AI-driven and cloud-native projects in dynamic environments.

Education

Sona College of Technology, Salem, Tamil Nadu Aug 2020 – May 2024
• B.E. in Electronics and Communication Engineering | CGPA: 8.46/10
• Honored with the Best Project Award in 2024

Experience

Software Developer | Mahima Technology Pvt Ltd | Salem, Tamil Nadu, India Aug 2024 – Present
• Optimized REST APIs with Python (Django/FastAPI) and JavaScript, improving performance by 20%.
• Deployed and maintained small-scale applications on AWS (EC2, S3), ensuring 99% uptime while collaborating with senior engineers.
• Designed and managed relational databases (PostgreSQL, MySQL, SQLite), improving query efficiency by 15%.
• Implemented responsive front-end features with React.js, jQuery, and Bootstrap, enhancing UI/UX for internal tools.

Projects

Budget Planner Application (Django, Python, Bootstrap, PostgreSQL) Jul 2025
• Built a personal finance tracker with category-wise analysis and real-time dashboards.
• Integrated AI-based automated report generation, reducing manual effort by 50%.
• GitHub : github.com/nawinasokan/budget_app

Smart AI Assist (Flask, Python, Tailwind CSS, JavaScript, Gemini API) Jun 2025
• Developed a single-page AI tool using Flask + Bootstrap for generating emails, blogs, and summaries.
• Leveraged Gemini API, enabling fast and accurate content creation with reduced processing latency.
• GitHub : github.com/nawinasokan/Smart_Ai

Invoice Data Extraction (Django REST API, Python, JavaScript, Gemini API) Jan 2025 - Mar 2025
• Designed a system to extract invoice data from PDFs/images using OCR + Gemini AI, achieving >90% accuracy.
• Automated data extraction pipeline, reducing manual processing time by 40%.
• GitHub : github.com/nawinasokan/Invoice_Generator

Technologies

Languages: Python, C#, SQL, JavaScript

Frameworks: Django, WinForms, FastAPI, Flask, React.js

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Tools & Platforms: Git, GitHub, Docker, Linux, AWS, GCP
