

Nawin Asokan

Executive – Software Developer

Tamil Nadu, India | nawinasokan16@gmail.com | 8300796919 | nawindev.vercel.app

linkedin.com/in/nawin-a-dev | github.com/nawinasokan

Career Summary

- Python Developer with 2+ years of experience in developing scalable web applications, REST APIs, and backend solutions.
- Proficient in Django, FastAPI, and Flask, with hands-on deployment experience on AWS and GCP.
- Skilled in database design and REST API development, ensuring scalable and efficient solutions.
- Recognized with the Best Project Award (2024) for innovative problem-solving.
- Passionate about developing scalable Python-based backend solutions in dynamic environments.

Education

Sona College of Technology (Anna University), Salem, Tamil Nadu

Aug 2020 – May 2024

- Bachelor of Engineering in Electronics and Communication Engineering (CGPA: 8.46/10)

Experience

Executive Software Developer | Mahima Technology Pvt Ltd | Salem, Tamil Nadu, India

Aug 2024 – Present

- Built backend systems with Django, PostgreSQL, Celery and Redis, including a platform handling 150M+ rows.
- Improved database query efficiency by 15% across PostgreSQL and MySQL.
- Deployed and maintained applications on AWS (EC2, S3) with 99% uptime.
- Delivered a full-stack project with FastAPI endpoints and a JavaScript/Bootstrap front end.

Projects

Audio Annotation & Transcription (Django, Python, PostgreSQL, Gemini API)

Jul 2026 - Present

- Built a multi-stage audio annotation and transcription platform with AI-powered transcription, translation, task workflows, and role-based access control
- Integrated Google Gemini AI APIs for automated speech-to-text transcription and translation, reducing manual annotation effort by 50%.
- Role-based workflow tool automating audio transcription and translation with Gemini

F1 — Enterprise QC Audit & Reporting Platform (Django, PostgreSQL, Celery, Redis)

Apr 2025 – Jul 2026

- Built a multi-module audit and reporting platform with Excel ingestion, dynamic field mapping, 8+ report engines, and real-time dashboards handling 150M+ rows
- Improved batch upload throughput by 5.2x and query performance by up to 78x through PostgreSQL partitioning, indexing, query optimization, and Excel pipeline enhancements.
- Scalable Excel-driven reporting system with dashboards and optimized PostgreSQL queries

Smart AI Assist (Python, Flask, Gemini API, JavaScript)

Jan 2025 - Mar 2025

- Built a single-page AI web app for email drafting, blog writing, and text summarization with async API calls and response caching, achieving <2s response latency.
- Created a reusable prompt-engineering layer for 3 content types, reducing token usage by 25% and eliminating prompt duplication.
- Single-page generative AI app with cached responses and reusable prompts

Technologies

Languages: Python, SQL, JavaScript

Frameworks: Django, FastAPI, Flask, React.js

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Tools & Platforms: Git, GitHub, Docker, Linux, AWS, GCP
